Lips.....	1300

What is Permanent Makeup?

Permanent Makeup (PMU) or Semi-Permanent Makeup (SPMU) also known as Micropigmentation, Cosmetic Tattooing or Derma Pigmentation is a form of temporary tattooing, as a means of producing designs that resemble makeup. Advanced pigments are implanted into the epidermis of the skin using exceptionally fine needles.

PMU Pigments:

We are excited to present the PERMABLEND range – bringing you the next level in pigment/ink colour for all your permanent makeup and microblading needs. Created by the manufacturer of World famous inks with over the past 50 years industry experience, they have forged the creation of a proprietary formula that fuses the highest quality inks with the solid, core viscosity of every color.

PermaBlend is a mix of tattoo and permanent makeup pigments that ensures the best quality colours for PMU and Microblading.

Manufactured in the USA by the world biggest Tattoo ink manufacturer, World famous Tat Results are simply fantastic!
